

The No-Mess, Interlocking, Flexible Floor Tile System

FLEXI-TILE

interlocking floor tile system offers a versatile and competitive flooring solution with an almost unlimited range of applications.

The Flexi-Tile range is injection moulded from 100% recyclable PVC and is quick and easy to install.

Flexi-Tile can be installed over virtually any existing substrate including timber, concrete, resin, quarry tiles, terrazzo and linoleum. Flexi-Tile provides an easy, rapid solution to covering damaged and contaminated floors and is an extremely resilient, ergonomic flooring system.

Recycling our waste; caring for the environment...

can recycle used Flexi-Tiles at the end of their life cycle into brand new Flexi-Tiles. The floor tiles can be returned to our recycling facility, reducing the burden on finite natural resources.

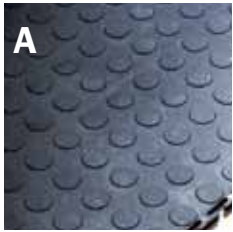

We take responsibility for the products and services we offer with regard to the effect they have on the environment.

We are steadfastly committed to minimising the impact of our commercial and industrial activities on the environment and, under the Carbon Trust Initiative, are reducing our carbon footprint significantly.

 **recycle**
100% Recyclable

Installation? It's as easy as A-B-C

Installation of Flexi-Tile should be commenced from the centre of the floor working outwards in a circular pattern. It is necessary to leave a 5mm gap in between the tiles and any fixed point (i.e. wall and machinery) thus allowing tiles free movement to expand and contract.

In applications of extreme temperature fluctuations, please contact our Technical Department for further information and in areas subject to direct sunlight or high temperatures it may be necessary to use an adhesive.

Corners & Edges

Flexi-Tile is available with a unique corners and edges system (not available in Homestyle range). A mat area can be made as large or as small as required.

Cleaning & Maintenance

Flexi-Tile's impervious surface means that it is also quick and easy to clean; damp mopping, machine or hand scrubber is ideal. To enhance and maintain Flexi-Tile's appearance, 2-3 coats of a sealer may be applied to the tile after installation. A full maintenance and cleaning programme is available.

Durable, yet comfortable

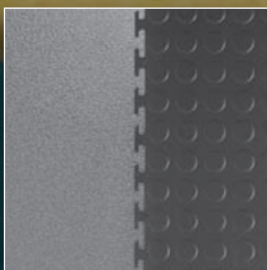

Flexi-Tile Commercial has been specially designed to provide a durable yet comfortable anti-fatigue floor. It is softer than Flexi-Tile Industrial and is ideal for offices, gymnasiums, crèches & schools.

Its flexibility makes it easy to install and gives it a good anti-slip surface. Flexi-Tile Commercial is available in 7mm, 5mm and 4.5mm PVC Interlocking tiles and in a combination of moulded, raised, studded and flat textured surfaces. These ranges are also available as an anti-static flooring material complying to these 3 separate standards:

- Anti-Static
- E.S.D. (electro static disappative)
- Conductive

COMMERCIAL
Flexi-Tiles come in
Textured & Studded
finishes for unlimited
applications

“Flexi-Tile's Interlocking loose lay system requires no adhesive, therefore no fumes, thus enabling installation to take place alongside populated areas.”

Tough & robust, for heavy duty use

The durable property of **Flexi-Tile Industrial** makes it ideal for areas of heavy traffic such as factories and warehouses.

Flexi-Tile Industrial is available in 7mm and 5mm PVC Interlocking tiles that can be laid over any surface, in a combination of moulded, raised, studded & flat textured surfaces.

No adhesive required & a dream to clean

Flexi-Tile Homestyle is aesthetically pleasing with a natural stone look. It provides an excellent alternative to bonded vinyl tiles or sheet goods.

The Homestyle range has the advantage of easy glueless installation with the unique interlocking mechanism being hidden below the surface of the tile. They provide a comfortable floor that is easy to maintain. An occasional damp mopping is all it takes to keep your Homestyle floor looking like new.

Interlocking with an almost invisible seam

The **Flexi-Tile Diamond Plate** has a novel interlocking system that, when installed, renders the joining mechanism virtually invisible.

Flexi-Tile Diamond Plate is available in 4mm PVC Interlocking tiles. It is ideally suited for use in retail outlets, commercial properties, domestic counters as well as gyms and sports halls. and provides all the same advantages as the standard Flexi-Tile.
